

GWOFFGRID POWER STATION

5 YEAR WARRANTY

GWOFFGRID Power Station

Designed for easy outdoor installation into residential or commercial premises. The Power Station is pre-wired and configured with only final connections needing to be made by a licensed electrician. Power Station is backed by Australia's best 5 year Warranty.

Configure for 5 or 6Kva 48volt or 3Kva 24V. All configurations enable easy battery expansion and install in 2 hours to existing sub boards.

Monitor the Power Station with the optional system monitoring add-on that works either over the internet or local via direct WiFi or ethernet to your browser.

AutoStart generators are available to extend the inbuilt storage or utilise the 2 wire auto-start contacts with your existing generator making the Off Grid Power station truly versatile. Speak to your reseller or installer today for pricing and availability.

GWOFFGRID POWER STATION

Save Thousands Off Electrician Fees

Installing off grid solar with your electrician can take days. Installing a GWOFFGRID Power Station typically takes 2 hours with only final connections needing to be made. The Power Station is pre-wired and pre-configured and is shipped to you fully operational. Is your local sparky an off grid solar expert or is he beer off just hooking in the Power Station?
